Introduction

We specialise in the repair and supply of reusable surgical instruments.

Using modern technology and unique techniques, we are able to offer a remarkable quality of surgical instrument repair and maintenance to suit your requirements. Our fully flexible service has evolved to cater for your individual needs. Our wealth of experience ensures that we are able to repair and service all types of surgical instruments used in modern day operating theatres to the best standards.

Accredited company to **ISO 13485:2016**

We believe in doing things right. With our wealth of experience and exceptional customer service, our company provides its customers with complete satisfaction and a hassle free service along with a very competitive price list, thus ensuring that your instruments are back in full working order in the least amount of time.

Our Quality Management System is accredited to ISO 13485. The repair of surgical instruments is included within the scope of our Quality Management System, meaning that the processes and procedures related to repair are integrated and controlled within the system.

This ensures that all staff at Cutting Edge Surgical Instruments are working with a focus on quality, for example, maintaining and retaining accurate records and performing relevant inspections to confirm that the instruments are operating as expected and remain within their original intended purpose.

Dental Drills (inc Drive Cables etc)

Diamond Knives and all Ophthalmic Instruments

Phaco Handpieces

Rigid and Semi Rigid Endoscopes

Full Instrument Set Refurbishment

Repair Process

01. Instruments Received

Instruments are received, the paperwork is checked and the order is added to the system, which in turn will generate the internal job card and a quote is sent to the customer.

02. Repair

Our repairs cover sharpening, realignment, full service, new jaws, ratchets recut, reset, spring replacement, new screws, polishing, gold plating.

03. Quality Inspection

All repairs are inspected and issued with an inspection record. Each instrument is etched with a repair date and individually packed.

04. Delivery

Once all instruments have passed the quality inspection, a delivery note is generated along with an individual service report sticker. The goods are then packaged ready for despatch. The completed repair order will then be delivered by either your dedicated CESI Area Representative or our contracted delivery company.

Our Service

Includes 5 working day turnaround

Includes emergency 48 hour turnaround if required

Includes Collection and Delivery by a qualified Team Member

Includes Full Traceability on all instruments

Includes service reports for all instruments/equipment repaired

Includes guarantee against faulty workmanship and parts

Preventative Maintenance

The preventative maintenance service program is to keep your surgical instruments in tip top working condition. This service will help to prolong the life of your everyday surgical instruments and bring them back to an 'As New' standard.
